

# SPECTATOR BARRIERS

## 1 SPECTATOR BARRIER SYSTEM

This is a galvanised steel system suitable for clubs, schools and universities. The system is an ideal way to barrier pitches or walkways and is designed specifically for use with the unique turf screw, negating the requirement for concreting in sockets. The uprights are 0.95m high out of ground and the top rails are 2.1m long, all are polyester powder coated white and manufactured from 42mm diameter galvanised steel complete with key clamp fixings (turf screws must be ordered separately)
