These new improved posts are suitable for use on any surface and the full regulation net height can be achieved. Posts come complete with heavy duty brass winder and pulley wheel and rubber pads on the bottom protect each surface type. Uprights manufactured from 76mm diameter steel, powder coated black. The steel posts are joined with pre-galvanised steel box section

Conforms to BSEN1510

**B TEN1020\***

Freestanding tennis trolley for use with 76mm square freestanding tennis posts

**2 INTEGRAL WEIGHTED TENNIS POSTS** BUY NOW

**TEN1047\***

Posts come complete with ski plate and rubber bottom which provides grip and protection, spreading the weight of each post thus reducing pressure on the playing surface. Full regulation net height can be achieved, the net attaches to the upright via synthetic net hooks. Complete with heavy duty brass winder and brass pulley wheel. Overall depth of base (front of ski plate to rear of the wheels) is 1503mm. Front of upright to rear of base (rear of the wheels) is 854mm. The detachable uprights are manufactured from 80mm square aluminium, the 1.18m wide, base frame is manufactured from 76mm square aluminium, the rear ballast is electroplated steel with an aluminium tube external housing. Complete with two cellular wheels which improve manoeuvrability. Powder coated matt black

**A TEN1048\***

Base pad designed to protect the roller on integral weighted tennis posts

**B TEN1028\***

Black 3.5mm polyethylene net for use with the integral weighted tennis posts

**3 TENNIS NETS** BUY NOW

**TEN1008\***

Black tournament tennis net, 12.8m long manufactured from 3.0mm heavy braided polyethylene with black banding on the side and bottom

**TEN1009\***

Black tournament tennis net, 12.8m long manufactured from 2.5mm single twine polyethylene with black banding on the side and bottom

**Our quality indoor tennis back drop screens are made to suit any hall size and in various different ways** [VIEW PRODUCT](#)

Our indoor tennis screen can be hung from support brackets to main steelwork incorporating full framework to all sides of tennis screens, manufactured from 33mm diameter steel powder coated tubes. Alternatively tennis back drop screens can be loose hanging from steel tension wires or heavy gauge aluminium alloy extruded trackway allowing them to be retractable if required

Tennis screens can be manufactured to incorporate vision panels, pull out fire exit panels etc

Our Tennis division nets and division screens can be hung from steel tension wires or heavy gauge aluminium alloy extruded trackway

We can offer various types of nets with different mesh sizes and options to incorporate cotton screens as a visual division between courts. If screens are to be provided we would recommend using trackway and can be supported by lanyard cords which prevents the netting from stretching
