

Each trail incorporates a wide variety of activities, providing hours of fun for children. We have included just two of the many trails available so please contact our Sales Department should you require any additional equipment, prices for single pieces of equipment or for installation prices. All round timber poles used are laminated which vastly reduces the natural effect of the fibre separation that causes splits in the poles and produced from extremely slow grown pine from totally sustainable managed forest. All equipment has been independently tested to BSI and is kitemarked as proof of compliance to the European Playground Safety Standards BS EN 1176
